NOTE: By joining an online session, you must leave the THQ controlled environment in WWE Smackdown! vs. RAW. The games content has been rated for Teen audiences, but the content of the game may change due to interactive exchanges. THQ and Sony Computer Entertainment America take no responsibility for content external to the game itself. Please see the terms of use for online play at www.thq.com.

So, you think your created Superstar has what it takes to challenge players around the world? To play WWE Smackdown! vs. RAW ONLINE, you'll need a Network Adapter, (Ethernet/modem for PlayStation®2) or a supported networking device. You will also need an Internet service provider.

SETTING UP

The first time you try to go online with WWE Smackdown! vs. RAW, the game will ask you to accept the User Agreement then set up your connection. You may have already set up your connection using the Sony Network Adapter Start-Up Disc.

If you haven't set up your connection, select Network Configuration. From the Network Settings menu, you can add or edit pre-existing connections available on your memory card. To add a setting, select Add Setting from the menu and choose which memory card in which you want to save your settings. You will need to select the type of Hardware you are using and input your connection settings (i.e. user name, password, phone number to dial, DNS settings etc.).

After you are finished, you will be prompted to save your settings to your memory card. At this point you can test your connection then return to the WWE Smackdown! vs. RAW Main Menu. Your network settings are now saved and you are ready to go online!

GETTING STARTED

Once your hardware is connected and properly configured, you're ready to go online. Select Online from the Main Menu and accept the WWE Smackdown! vs. RAW ONLINE USER AGREEMENT – Select which memory card your network configuration is located and choose your connection. The game will then log you onto the network. Next, you will be asked to enter your name, registering it with GameSpy®. WWE Smackdown! vs. RAW uses GameSpy® (www.gamespy.com) for its online matchmaking. Remember not to divulge any personal information over the Internet.

At this point you can select your difficulty area from four levels of gameplay: Amateur, Rookie, Pro, or Legend. Each difficulty area has several rooms, each accommodating 20 online players. You can enter any available room, or search for your friends by pressing the ● button. If your friend is found, you will have the option to join them in the room they are currently occupying.

Once you select a room, you will see the list of games on the left and the chat window to the right. You can press the R1 button to scroll between a list of users in this particular room and the chat window. The game options are as follows:

BUSY GAMES – These are games that are currently occupied or not finished being set up by the host.

READY GAMES – These are games that have been created and are available to be joined. The type of match (Single or Bra and Panties) is listed at the upper right of this window. The title of the match and the person hosting are listed in the middle, and the Superstar the host has selected to play with is on the left.

CREATE GAME – This option allows you to create your own game and preferences for online play.

JOINING A GAME

If you choose to join a game, your name will be sent to the host, asking to join their room. Once they accept you can view the match settings and choose your Superstar. The chat window is now at the lower right. Before continuing on to Online play, you can select whether your Superstar has Original or Season stats by pressing the left or right directional buttons before choosing your Superstar. You can also randomly select a Superstar by pressing the ● button. After you select your Superstar, you can choose whether they have a Clean, Dirty, or Neutral bar during gameplay. For more information on the Dirty or Clean bar, see page 9 in this instruction manual. Once your personal selections are made, the match will begin.

HOSTING A GAME

If you choose to host a game, you'll be presented with several options.

MATCH TYPE – Choose whether your match will be a Single match or a Bra and Panties match.

SUPERSTAR – Choose your Superstar or Created Superstar from the menu and select whether or not you play with Original or Season Stats. The Superstar's overall rating is listed under their picture. Next choose for your Superstar to be Dirty, Clean or Neutral. For more information see page 10 in this instruction manual.

ENTRANCE AND ARENAS – Choose whether or not the Superstar's entrance into the arena is shown and which arena the match will take place in.

MATCH TITLE – Title the match anything you want! You are now ready to host your own match and take on anyone.

Notes on Online Play

- When playing online you will not be able to pause gameplay.
- You can still view and change options in the Pause Menu.
- After a match is completed, you will be returned to the room you were previously in.
